HEALTH HAZARDS

Eye  Corrosive - irritant. Contact may result in irritation, lacrimation, pain, redness, corneal burns and possible permanent damage.

Inhalation  Corrosive - toxic. Over exposure may result in mucus membrane irritation of the respiratory tract, coughing and possible burns. High level exposure may result in ulceration of the respiratory tract, breathing difficulties, chemical pneumonitis and pulmonary oedema.

Skin  Corrosive. Contact may result in irritation, redness, pain, rash, dermatitis and possible burns. Prolonged or repeated contact may result in ulceration.

Ingestion  Corrosive - toxic. Ingestion may result in burns to the mouth and throat, nausea, vomiting, ulceration of the gastrointestinal tract, breathing difficulties, circulatory collapse and coma.

FIRST AID

Eye  If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre (PIC) or a doctor, or for at least 15 minutes.

Inhalation  If inhaled, remove from contaminated area. To protect rescuer, use a Full-face Type B (Inorganic and acid gas) respirator or an Air-line respirator (in poorly ventilated areas). Apply artificial respiration if not breathing.

Skin  If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Continue flushing with water until advised to stop by a Poisons Information Centre (PIC) or a doctor.

Ingestion  For advice, contact a Poison Information Centre on 13 11 26 (Australia Wide) or a doctor (at once). If swallowed, do not induce vomiting.

PRECAUTIONS

Flammability  Non flammable. May evolve toxic gases (chlorine) when heated to decomposition.

Reactivity  Incompatible (violently) with oxidising agents (eg. hypochlorites), acids (especially hydrochloric - evolving chlorine gas), organic materials, reducing agents (eg. amines), metallic powders, amines, ammonia and heat sources. Also incompatible with metal salts (eg. magnesium chloride). May evolve highly flammable hydrogen gas on contact with metals.

Ventilation  Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical extraction ventilation is recommended.

PERSONAL PROTECTIVE EQUIPMENT

Wear splash-proof goggles, rubber or PVC gloves and coveralls. When using large quantities or where heavy contamination is likely, wear: a PVC apron, rubber boots and a faceshield. Where an inhalation risk exists, wear: a Full-face Type B (Inorganic and Acid gas) respirator.
